Qwen2.5-32B / seed 41 / 458 states, 295 problems
Exploratory single-seed validation; unadjusted intervals
Fixed validation panel
Natural decision
Forced reflection
Independent retry
Keep initial answer
Correct (%)
Training step (0 = base)
Observed behavior (not string likelihood)
Sampled REFLECT
Valid format
States (%)
Training step (0 = base)
Four forced samples per state
Repair | initially wrong
Damage | initially correct
Forced intervention rate (%)
Training step (0 = base)
Paired 95% cluster intervals vs base
Accuracy difference (percentage points)
Training step (0 = base)
